Microguard Filtration System

0.15 micron Hollow Fiber Filtration

Great Tasting and Safe Water
without a
Reverse Osmosis System

Green

Microguard Filtration System

using the **best filters** made by Pentair Corp.

Polydepth Sediment Filter

5 micron is a very fine filter, a human hair is 50 to 60 microns, the smallest you can see with the human eye is 30 microns so 5 microns is a really fine filter

ChlorPlus 10

This filter is a 1 micron carbon block filter that is capable of removing chlorine, chloramines, bad taste and odor, and sediment down to 1 micron in size.

Microguard

Hollow Fiber Filter goes down to 0.15 microns in size by mechanical means. This give it the ability to remove 99.99% of the microbiological growth by mechanical means.
