

ULTIMA

5810-12 Water Softener

High Flow Commercial

This sophisticated system is easily programmed to match your family's water needs.

Five-cycle regeneration maximizes the system's efficiency. Demand-initiated regeneration saves you money on salt and water because the softener only regenerates when needed, based on your family's actual water usage. Plus, with internal by-pass, you'll always have continuous water during the backwash and regeneration cycles. External by-pass valve is also included for ease of service.

Our touch screen digital display makes programming simple. And there's no need to worry about power outages because the electronic system maintains your program settings.

The Ultima Water Softener: easy and versatile.

- The 1" flow-through valve meets NSF/ANSI 44 requirements. It's ideal for larger homes because it supplies more water with less pressure drop.
- The system's composite material is durable and corrosion-resistant.
- Cycles are fully adjustable so settings are customized for your needs.
- Designed with a minimum number of moving parts means easy maintenance.
- The sturdy polyethylene brine tank holds up to 250 lbs. of salt. And the reliable brine safety valve incorporates built-in safeguards that prevent brine tank overflow.
- Highly efficient resin is designed to be long-lasting and chlorine resistant.
- Resin tank is NSF-certified and made from non-corrosive, reinforced fiberglass.

Residential Benefits

No Water Spots

Softer Clothes

Easier Rinsing

Less Detergent

No Scale Build-Up
